

***S610 - Special Dental Test Attachments***

*The Dental School of Dublin requested some special attachments to be manufactured by Tinius Olsen. Tinius Olsen were supplied some examples of the test specimens, from which the special grips were designed and manufactured*

*Other tests can also be carried out using the Tinius Olsen test machine. Examples include regular tensile, shear, bond strength (tensile and shear), flex bend, peel, compression and puncture. All possible using a single Tinius Olsen test machine.*

*Other specials required by Dublin Dentist School are shown below...*

***Pull-out test on two part dental adhesive***  
*(Loop 'set' into adhesive compound)*

***Tensile test on composite tooth post***
