

## 122-007 Side operating pneumatic grip, 5kN

Single sided pneumatic grips with 5/8" female interface. Allows offsetting of each grip to perform tests on varying thickness samples as well as lap shear or other offset tensile/peel tests. Conventional centerline tensile/peel tests are easily accommodated, similarly changing of jaw faces for differing test materials.

Grips require the use of the high flow pneumatic control unit and can be used with a grip positioning add-on device for more automated testing set-ups.

**Application:** Flat flexible materials, textiles, paper, film, polymers.

**Compatible with:** Tinius Olsen ST series of materials testing machines

**Specification:**

**Max. Capacity:** 5kN (1,000 lbs)

**Min. Load cell:** 500N

**Construction:** Aluminium anodized body

**Mounting interface:** Quick change, no backlash

(This grip comes with 5/8" female interface as standard)

**Dimensions:** 225mm high

**Max. clamping force:** 10kN (2,000 lbs) at 80psi/5.5bar

(clamping force stays constant even if sample reduces in thickness)

**Specimen dimension:** 23mm thick (Width depends on fitted jaws)

**Weight:** 7.3kg (without jaw faces)

**Operating air supply:** 80-100psi / 5.5-7bar

**Temperature range:** -30° to 70°C.

Other jaw faces are available on request.

**Typical standards include:**

<b>Fabric</b>	ISO 4637, 9073-3, 9073-4, 13936-1, 13936-2 ASTM D413, D434, D751, D885, D1117, D1682, D1683, D1775, D2261, D2724, D2970, D3107, D3787, D4034, D4851, D4964, D5034, D5035, D5278, D5446, D5587, D5733, D5735, D5822, D6614, D6479, D6775, D6797 EN ISO 1421, 2411, 4674-1, 9073-4, 13934-1, 13934-2, 13935-1, 13935-2, 13936-1, 13936-2, 13937-1, 13937-2, 13937-4 EN 1875-3 M&S P11, P12, P13, P14, P14A, P14B, P14C, P15, P15A, P35, P42, P43, P98 IGB, AS, Next, Adidas, Arcadia, SAC, BS, GAP, H&M, IUP Ltd, Nike, Pacific Brands and more ....
